Embedding the Contact form into your website

mySeat's online booking form is taking reservations from guest in real time. The guest can only book available space, get email notifications and the restaurateur will see the reservations in the main application immediately.

```
<!-- *
 * The following 3 lines should be copied into your websites reservation page
 * Adapt the page layout by setting the CSS styles directly in api/style/style.css * -->

<iframe height="1300" width="560" src="reserve.php?propertyID=1" scrolling="no" class="frame">
  <p>Your browser does not support iframes.</p>
</iframe>

<!-- end copy code -->
```

It is possible to embed the online contact form into your website. This is done via HTML iframe. Please see the **bookingsample.html** in the **api** folder for sample code.

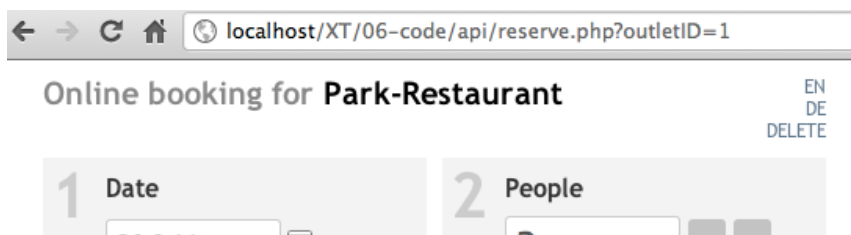

Code:

```
<iframe height="1300" width="560" src="reserve.php?propertyID=1"
scrolling="no" class="frame"> <p>Your browser does not support
iframes.</p></iframe>
```

Links parameter

There are 2 types of parameter for the links of the iframe:

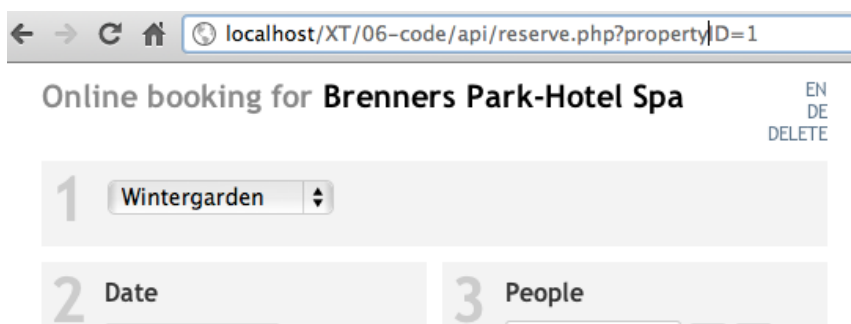

1. To book a single outlet: outletID

The screenshot shows a web browser window with the address bar containing the URL: `localhost/XT/06-code/api/reserve.php?outletID=1`. The page title is "Online booking for Park-Restaurant". In the top right corner, there are links for "EN", "DE", and "DELETE". The main content area has two numbered steps: "1 Date" and "2 People". Each step has a corresponding input field.

Your link is providing the outlet's ID: „/api/reserve.php?outletID=“

2. To book a property. Users have the choice of outlets: propertyID

The screenshot shows a web browser window with the address bar containing the URL: `localhost/XT/06-code/api/reserve.php?propertyID=1`. The page title is "Online booking for Brenners Park-Hotel Spa". In the top right corner, there are links for "EN", "DE", and "DELETE". The main content area has three numbered steps: "1 Wintergarden", "2 Date", and "3 People". Step 1 is a dropdown menu currently showing "Wintergarden". Steps 2 and 3 have corresponding input fields.

1. Your link is providing the property's ID: „/api/reserve.php?propertyID=“

Please pay attention to the top of the form.

The outlet selection varies according to the transmitted reference.

You find the correct links, respective your property and outlet's ID for the iFrame in mySeat. Login, go to ,System' > ,Outlets' > Klick an outlet's name.
Go to the end of the outlet's detail page:

Online Booking Links

Park-Restaurant :

<http://localhost/XT/06-code/api/reserve.php?outletID=1>

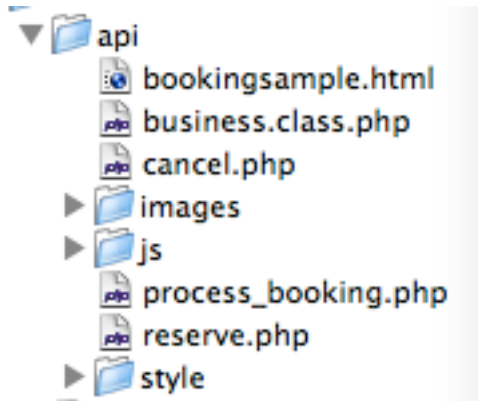

Objekt :

<http://localhost/XT/06-code/api/reserve.php?propertyID=1>

Style

The booking form can be adapted to your websites layout and style. Please change the css style directly in the booking form's css files.

That can be found in „**api/style/style.css**“.

Settings

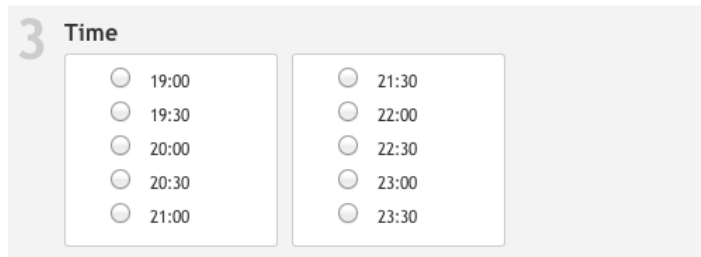

In the file /api/reserve.php you find 2 settings. Please edit the file with the editor of your choice.

```
5
6 // ** SETTINGS **
7 // Select the type of time selector:
8 // 'radio': radio buttons; 'drop': select box
9 $time_selector = "radio";
10
11 //link to terms&condition page
12 // Your license
13 //$terms_link = "http://www.mysite.com/license.html";
14 // mySeat license
15 $terms_link = "http://www.myseat.us/terms.htm";
16 // GNU license
17 //$terms_link = "http://www.gnu.org/licenses/gpl-3.0.txt";
18
19 // END settings
20
```

Time selection

There are the possibility to select from a drop down menu or radio buttons to select the reservation time.

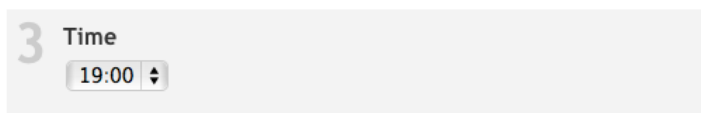

Radio buttons:

The screenshot shows a section titled '3 Time' with two columns of radio buttons. The left column contains times from 19:00 to 21:00 in 30-minute increments. The right column contains times from 21:30 to 23:30 in 30-minute increments. No button is selected.

| Time | Time |
|-----------------------------|-----------------------------|
| <input type="radio"/> 19:00 | <input type="radio"/> 21:30 |
| <input type="radio"/> 19:30 | <input type="radio"/> 22:00 |
| <input type="radio"/> 20:00 | <input type="radio"/> 22:30 |
| <input type="radio"/> 20:30 | <input type="radio"/> 23:00 |
| <input type="radio"/> 21:00 | <input type="radio"/> 23:30 |

Drop down menu:

The screenshot shows a section titled '3 Time' with a single drop-down menu. The menu is currently displaying '19:00' with a small upward and downward arrow icon to its right.

While the radio buttons are easier to access on computers and laptops, the select box is better accessible by touch devices like tablets.

Regarding to the open times of the outlets, keep in mind, that the height of the radio button section vary with each outlet.

Please make sure that the iframe is high enough with radio buttons selected.

Link to Terms & Conditions

Set the link to your terms and conditions page in the second parameter. If you do not want to use your own terms and condition, use the ones from mySeat.

Online booking form

mySeat is taking some settings from the ,General Settings‘ of mySeat’s main application (System > General).

Language

The user of the online booking form has the choice to choose between english language and the local language, set in the general settings. All translations are stored in the folder / web/lang.

See the manual or the general settings page, which language sets are actual available.

Maximum persons to book

In the online booking form the number of bookable guests are limited. The limit is generally set at the general settings page under „Max. Passerby“.

The „Max. Passerby“ can be adapted for each single day in the main reservations view under the „Detail“ button.

Email

The guest gets always a confirmation email and the restaurateur gets a copy of that email to the email adress set in the outlets details. Each reservation get an booking number.

Online cancellation form

The booking form provides a link to the cancellation page at the top of the page.

Guest can cancel their reservations here by using the booking number and the email adress.
